## VOLUMIZING

**Sunekos® 200** is easy to use and is compatible with most injection techniques.

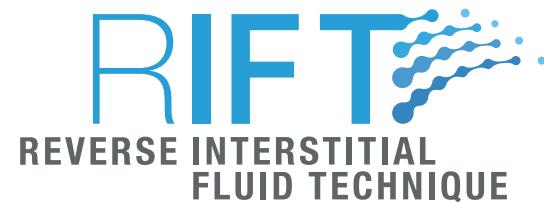

**Sunekos® 200** can be injected with:

A

TRADITIONAL  
TECHNIQUES  
(MICRO-BOLUS OR  
RETROGRADE  
LINEAR INJECTION)

B

WITH A  
PROPRIETARY  
TECHNIQUE TO ACHIEVE  
THE BEST RESULTS

# IFT: Interstitial Fluid Technique Patient Customised Methodology

The **direction** of the sequence of the injection points and the combined massage to enhance or counteract the spreading of the product will allow you to obtain a specific aesthetic effect (**custom infiltrative technique**).

**WHEN:**  
to achieve a LIFTING Effect  
on relatively younger and elder  
round-faced people.

**LIFTING EFFECT**

**WHEN:**  
to achieve VOLUMIZING Effect  
on slender patients,  
with a sunken face.

**VOLUMIZING EFFECT**

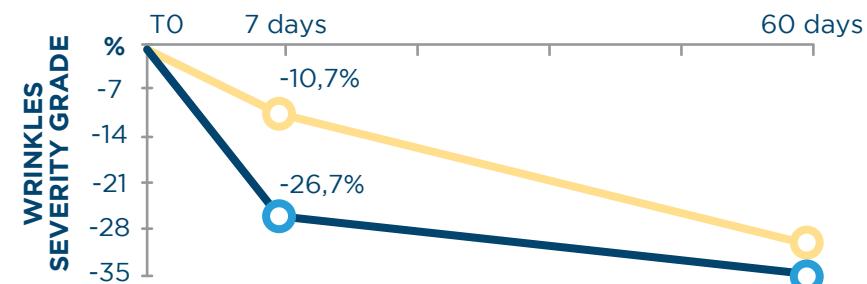

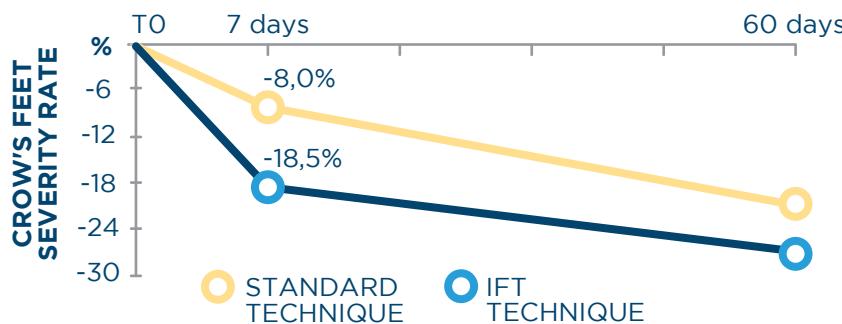

- Needles 27-30G and 12-13 mm
- Medium-deep Dermis injection
- 45° needle inclination
- Series of bolus - Distance of about 1.5 cm
- 0.1 ml injection per point
- Injections in the directions of flow
- Retrograde linear injection (nasolabial folds)
- Massage following the flow

**Interstitial Fluid Technique** is an injection technique developed by **Professional Dietetics medical team** to get faster results(\*) especially in the first phase.

IFT is combining the effect of  
**2 fundamental actions** for the treatment of the  
Extra Cellular Matrix in the dermis:

- 1 Medium-deep Dermis injection
- 2 Lymphatic Drainage

## Clinical Trial Results

(\*) clinical trial under publication process.

# Standard Protocol of use

## INDICATION

- This protocol is the most used and it fits to **round-faced and round carved people**.
- 4 treatments of **Sunekos® 200** at 7/10 day intervals each.

**One cycle of 4 injections at a distance of 7/10 days each. Repeat the cycle 2 times a year.**

## MAINTENANCE

Repeat **PROTOCOL A** after 6 months.

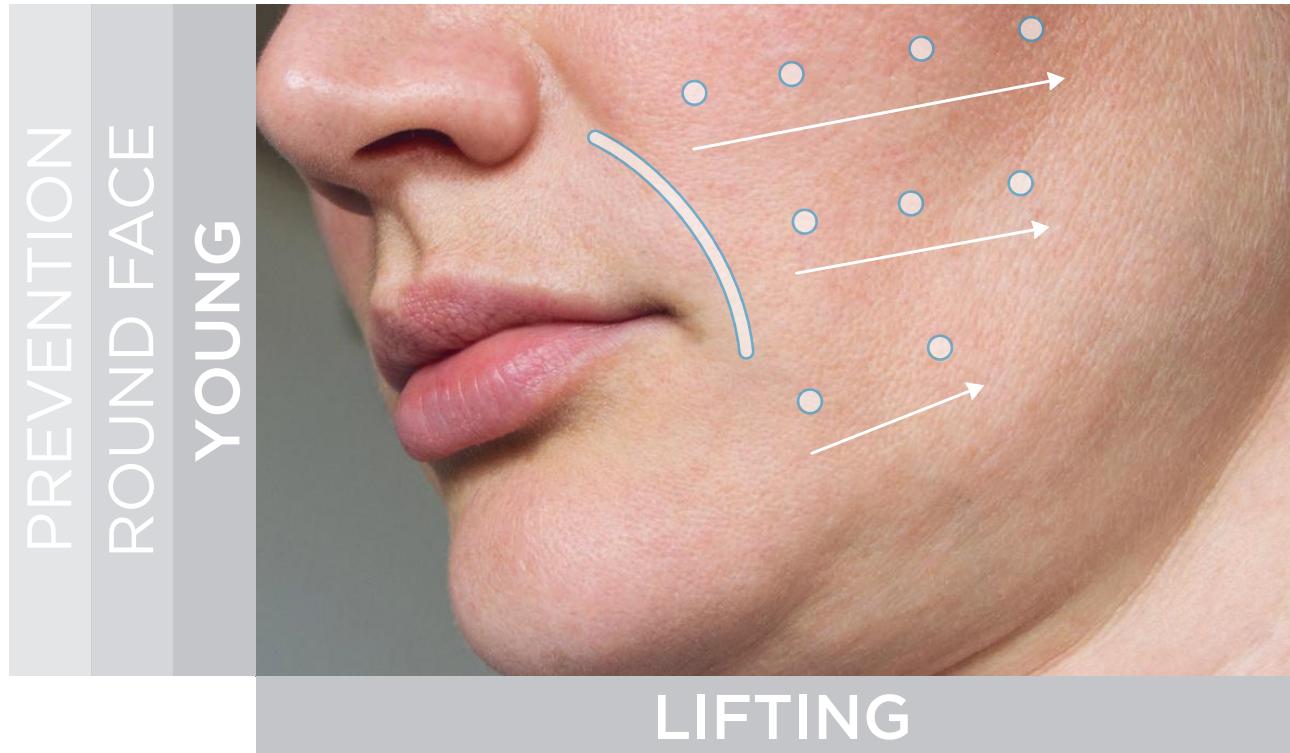

## DAILY SUPPORT

For a holistic approach add **Nutrakos Drinkable** every day.

## ALTERNATIVE

Alternatively MAINTENANCE can be done with 2 treatments every 3 or 4 months, repeating the full protocol with 4 treatments every 12 months.

FULL FACE  
TREATMENT  
ALGORITHM

- IFT leverages on the flows of interstitial fluid
  - Needle 27-30G and 12-13 mm
  - Medium-deep Dermis injection
  - 45° needle inclination
- Injections sequence towards the flow
  - 0.1 ml injection per point at about 1.5 cm distance
  - Retrograde linear injection (nasolabial folds)
  - Massage following the flow

# RIFT

## REVERSE INTERSTITIAL FLUID TECHNIQUE

- The sequence of injections goes from the periphery towards the center.
- Following, a light massage with the fingertip in order to support and stimulate the physiological flow of interstitial fluids, from the periphery towards the center.

**RIFT** is an injection technique with **opposite direction** to interstitial fluids.  
It is performed in areas of depletion and emptying of volumes.

**RIFT** helps to **distribute** the product on the center-face area  
and to **stimulate** the neo-regeneration of Extra Cellular Matrix.

**IMMEDIATE  
VOLUMIZING  
EFFECT**

# Standard Protocol of use

## INDICATION

- This protocol is the most used and it fits to **thin/elongated and carved/empty face people.**
- 4 treatments of **Sunekos® 200** at 7/10 day intervals each.

**One cycle of 4 injections at a distance of 7/10 days each. Repeat the cycle 2 times a year.**

## MAINTENANCE

Repeat **PROTOCOL A** after 6 months.

## DAILY SUPPORT

For a holistic approach add **Nutrakos Drinkable** every day.

## ALTERNATIVE

Alternatively MAINTENANCE can be done with 2 treatments every 3 or 4 months, repeating the full protocol with 4 treatments every 12 months.

REVERSE INTERSTITIAL  
FLUID TECHNIQUE

FULL FACE  
TREATMENT  
ALGORITHM

- Needle 27-30G and 12-13 mm
- Medium-deep Dermis injection
- 45° needle inclination

- Injections sequence against the flow
- 0.1 ml per point at about 1.5 cm distance
- Retrograde Linear Injection (nasolabial folds)
- Massage against the flow

# CUSHION TECHNIQUE

COMBINATION OF  
**suneKOS** + **suneKOS**  
1200      200

An internal trial comparing 2 groups with sagging skin, the first treated only with S200 and the second with S1200+S200 at the beginning as "**cushion**" followed by S200 standard treatment was giving the following results:

## IN CASE OF SEVERE WRINKLES & SAGGING SKIN

**Sagging Skin and Severe Wrinkles** are mainly caused by loss of volume.

To get the best results from **Sunekos®** we have to combine the action of a Medium/High density Hyaluronic Acid with a Low density HA such as **Sunekos® 200**.

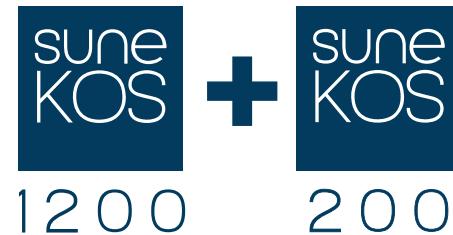

The solution is to use **Sunekos® 1200** in combination with **Sunekos® 200** creating a "scaffold" through the "**cushion**" technique.

Facial Volume  
Measurement in CC

+24%

FVLS improvement  
(photographic scale)

+33%

# Standard Protocol of use

## INDICATION

- This protocol fits to **elder people with round carved face or carved/empty face.**

**A**

1 treatment with **Sunekos® 1200 as a Scaffold** followed, on the same day or no more than 1 or 2 days later, by **4 treatments of Sunekos® 200** at 7/10 days intervals each.

**B**

Maintenance with  
1 treatment Sunekos® 1200 +  
1 treatment Sunekos® 200.  
Repeat after **4 and 7 months**  
from first treatment.

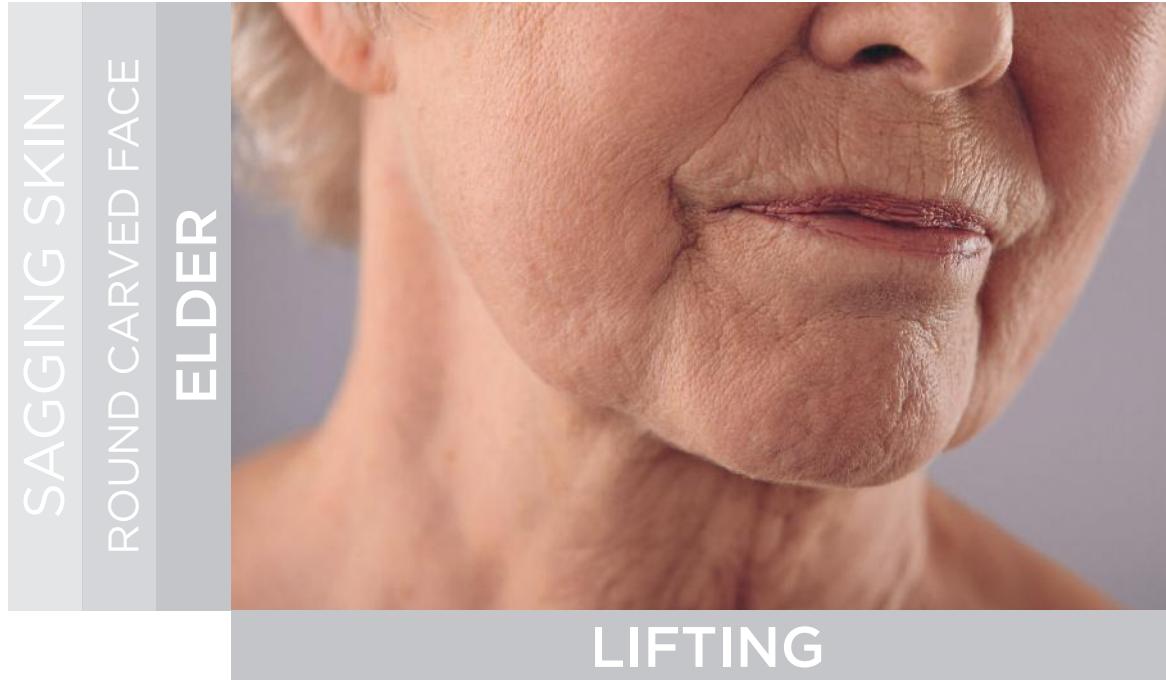

## DAILY SUPPORT

For a holistic approach add  
**Nutrakos Drinkable** every day.

# CUSHION TECHNIQUE + IFT INTERSTITIAL FLUID TECHNIQUE

- Cannula 25G and 40-50 mm
- Deep Dermis injection
- Fan Technique

- Needle 27-30G and 12-13 mm

- Cannula 25G and 40-50 mm
- Deep Dermis injection
- Fan Technique
- $\frac{1}{2}$  vial per side

The injection of **Sunekos® 200** with Cannula helps in reducing significantly forehead wrinkles in a natural way.

**The procedure consists in 3 phases:**

**Sunekos® 200 counteracts atrophy and tissue degeneration.**

**It can be used combined with other treatments improving their lasting and reducing the number of their applications.**

**PHASE 1** IS PARTICULARLY IMPORTANT  
ESPECIALLY AT THE FIRST APPLICATION.

## SPECIAL TECHNIQUE

DARK EYE  
CIRCLES &  
EYE BAGS

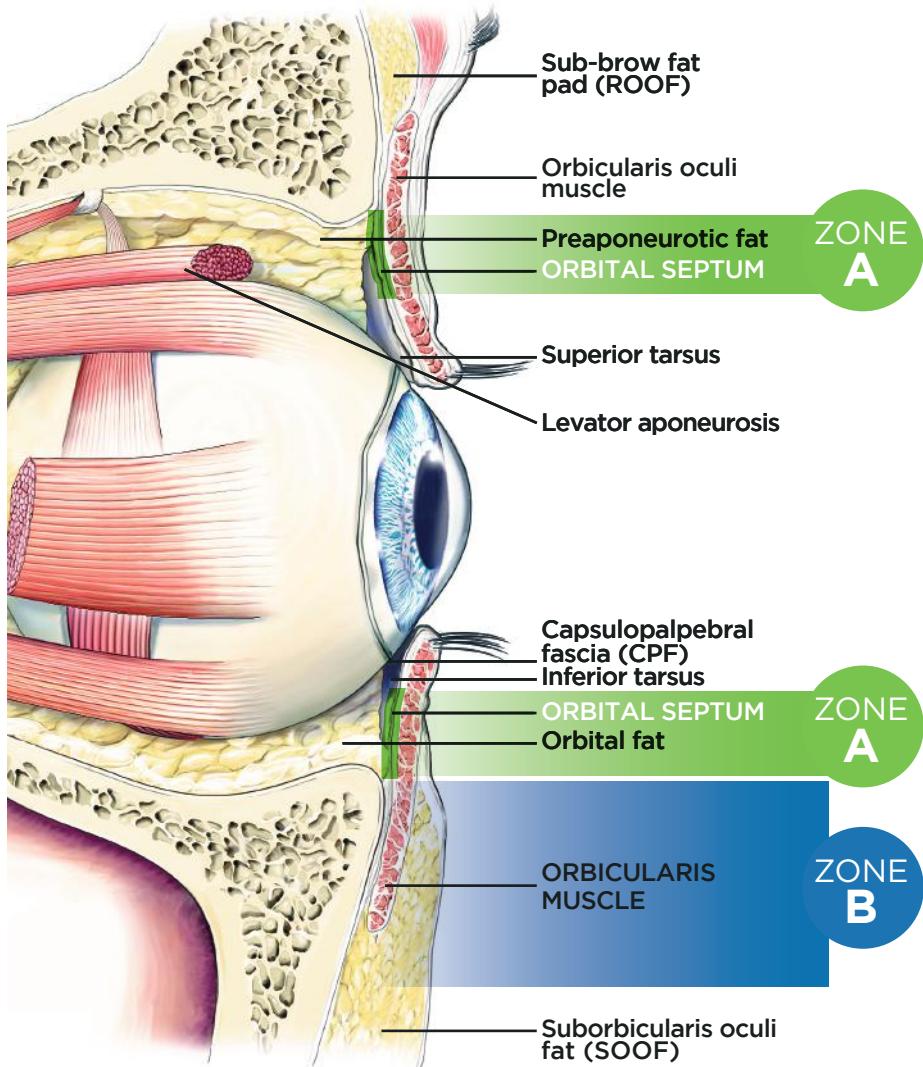

**Sunekos® 200, injected with a specific technique helps to stimulate the neo-regeneration of Extra Cellular Matrix giving thickness to the Skin.**

**QUICK  
COVERING  
EFFECT**

### WARNING

This technique must be performed after a specific training held by the medical staff of the local distributor.

# SPECIAL TECHNIQUE

DARK EYE  
CIRCLES &  
EYE BAGS

DUE TO THE  
CAPABILITY TO  
**PRODUCE NEW ECM**,  
IS PARTICULARLY  
EFFECTIVE TO  
REDUCE DARK EYE  
CIRCLES.

BEING  
ABLE TO  
**REPRODUCE ELASTIN**,  
IT CAN  
SIGNIFICANTLY  
REDUCE  
EYE BAGS.

- Before injecting in the periocular area, please be mindful of its anatomy.
- Over the orbital septum there is no vascularization.
- Any injection over orbital septum can generate damages.
- NEVER HIT THE ORBITAL SEPTUM. To avoid it please pay attention to:

ZONE  
A

**inject parallel to the skin & very superficial**

ZONE  
B

**Inject perpendicularly till touching the bone**

sune

# SPECIAL TECHNIQUE

DARK EYE  
CIRCLES &  
EYE BAGS

ZONE  
**A**

- ■ ■ Inject parallel to the skin & very superficial.
- Inject on the yellow lines in one 1 or 2 points.

ZONE  
**B**

- Inject perpendicularly till touching the bone.

## CAUTION

- Take extra care and avoid hitting veins.
- Carefully check the skin to avoid injecting the small veins, especially **ZONE A**.
- Reduce number of points of injection if the case.

# CUSHION TECHNIQUE

Thin skin of hands is one of the most affected by the loss of elastic properties.

The combined action of **Sunekos® 1200 + Sunekos® 200** injected with **Cushion Technique** helps to **rejuvenate the skin**.

IT IS RECOMMENDED TO ADD **SUNEKOS TROPHIC PEELING** AS A BIO-RESTRUCTURING SYSTEM BEFORE STARTING THE PROTOCOL AND AFTER THE LAST INJECTION.
